

**INTUITIVE provides the following  
Programmatic Support services:**

**CORE COMPETENCIES**

- *Systems Analysis and Integration*
- *Project and Technical Management*
- *Development and Rapid Prototyping*
- *Production Systems Support*
- *Quality and Reliability Support*
- *Simulation Analysis and Modeling*
- *Test Analysis and Support*
- *Technical Support*

- Project/Technology Management
- Project Control Metrics (C-S-P)
- Business Process Re-engineering
- Risk Analysis / Management
- Acquisition Planning Management
- Economic Analysis
- Parametric, Engineering, and Actual cost estimation techniques as the basis of design to unit cost (DTUPC), independent cost analysis, and technical cost and schedule risk analysis
- Development and utilization of O&S cost reduction models
- Support the bi-annual budget process, POM, mini-POM, PDM and PDB's including development of OMA and AWCF planning and execution models, customer reimbursable funds, as well as using R&D and Production Dollars
- Develop event-driven, logic-based schedules to support the management of numerous integration, development, and qualification programs involving:
  - critical path analysis
  - cost vs. schedule assessment
  - estimate to completion, variance analysis
  - recommended corrective action to achieve milestones and cost / schedule performance goals
