

**INTUITIVE provides the following
Systems Analysis & Integration services:**

INTUITIVE provides system analysis, technology integration and technology implementation support to companies transitioning from development to production. Our subject matter experts offer in-depth knowledge of technologies, tools and processes necessary to achieve feasible solutions that meet performance, cost and schedule objectives. Our services include program plans ranging from system definition to validation.

- Process Modeling and Simulation
- Requirements Definition and Analysis
- Life Cycle Cost Estimating
- Acquisition Planning
- Trade-off Analysis
- Analysis of Alternatives
- Producibility Analysis

CORE COMPETENCIES

- *Systems Analysis and Integration*
- *Project and Technical Management*
- *Development and Rapid Prototyping*
- *Production Systems Support*
- *Quality and Reliability Support*
- *Simulation Analysis and Modeling*
- *Test Analysis and Support*
- *Technical Support*
