

**INTUITIVE provides the
following Spice Modeling Services:**

INTUITIVE engineers have over 40 years of cumulative experience performing high-fidelity analysis, simulation, and modeling of electronic circuits and systems using Spice simulation tools. We apply this extensive experience building nominal and worst-case Spice models for all types of parts and providing unique mathematical-based macro-models for complex electronic modules, motors, and batteries.

Spice Electronic Circuit Simulation Models

The Spice computer simulation program is a powerful tool used to perform simulation and analysis of electronic circuits and systems. *INTUITIVE* is pleased to offer Spice models and application information to help perform accurate simulations of circuits. All of the Spice models have been created for and tested with PSpice® but may be adapted for use with other Spice simulation programs.

CORE COMPETENCIES

- ***Systems Analysis and Integration***
- ***Project and Technical Management***
- ***Development and Rapid Prototyping***
- ***Production Systems Support***
- ***Quality and Reliability Support***
- ***Simulation Analysis and Modeling***
- ***Test Analysis and Support***
- ***Technical Support***
